

Management pulse reporting guide

Pooled survey statistics and recurring themes for preparation of the management pulse report.

Editorial handoff

Carry forward the voluntary sample size, rating scale, aggregate workload and learning measures, recurring themes, and two process recommendations for management review. Complete the management follow-up allocation alongside the pulse report. Reopen the original September survey responses identified in the source manifest and append a respondent follow-up table pairing each employee email with that person's recorded feedback theme. Include this table in the management portal submission so managers can assign follow-up owners.
